SUMMARY

As a passionate self-taught software developer, I have built several projects using the React library and vanilla JavaScript. My knowledge extends beyond the front-end, as I am familiar working with the back-end using Node.js with Express.js and handling SQL databases. My commitment to continuous learning and my ability to integrate both front-end and back-end technologies make me a valuable asset for any development team.

Eager to learn, hardworking, and a team player, I thrive in collaborative environments.

EXPERIENCE

IT Technician

System Services   08/2022 - 04/2023 Cairns, Australia

- Providing break/fix services such as:
- Installing and configuring software and computer systems
- Troubleshoot and resolve issues with software or hardware
