SUMMARY

A passionate and driven Computer System Technology graduate looking a career in web development. Focused on designing and developing the layout and visual appearance and usability of a website using React library, but not shying away from the backend side (familiar with LAMP stack and NodeJS).
Eager to learn, hardworking, easy going by nature and able to get along well with everybody. Currently looking for a suitable web developer position.

EXPERIENCE

Web Developer

📅 2015 - Ongoing

- Building a massive e-commerce application similar to Shopify using React, Redux, React Hooks, React Router, GraphQL, Context API, Firebase, Redux-Saga, Stripe + more. This is going to be a full stack app (MERN stack), using Firebase.
- Designed and built and Noctis theme for Visual Studio Code editor with more than 270000 installs from the VS Code Marketplace.
- Designed and built fully responsive website and CMS for client using SASS, HTML5, MySQL, PHP using PDO abstraction layer and OOP paradigm
- Built a website for a yoga studio and increase members base by 15%
- Developed a CMS as part of Cert IV assessment
- Using Mobile First Design approach I have ported an unresponsive WordPress site to a fully responsive theme using SASS, BEM naming convention and Gulp toolkit
